DANILO MACCARI

Full Stack Developer

Bahía Blanca, Buenos Aires, Argentina | +54 9 291 444-4264 | maccari78@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with experience building and maintaining **production systems for government institutions and real-world products**.
Strong background in **Django, Next.js, PostgreSQL and containerized deployments**, working with **large-scale datasets (millions of records)** and secure authentication systems.

Recently led key initiatives in a government platform (IPS RUPA), including **frontend migration to Next.js**, **Keycloak authentication integration**, and deployment on **Kubernetes-based infrastructure (OKD/OpenShift)**.
Creator of **DocSync**, a production-ready HealthTech MVP built end-to-end in Ruby on Rails.

English level: **B1 (actively improving for professional fluency)**.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Ruby, Java
Frameworks: Django / DRF, Next.js, React, Ruby on Rails, FastAPI
Databases: PostgreSQL, MySQL (AWS RDS), MongoDB
Auth & Security: Keycloak, OAuth2, JWT, Devise, OmniAuth
DevOps & Cloud: Docker, GitLab CI/CD, Kubernetes, OKD / OpenShift, ArgoCD, AWS
Frontend: Tailwind CSS, Bootstrap, Material UI
Practices: Agile / Scrum, Clean Code, SOLID, Microservices

PROFESSIONAL EXPERIENCE

Full Stack Developer — SOWTIC

Remote · May 2025 – Dec 2025

Full-stack development for **IPS RUPA**, a government system for the Instituto de Previsión Social (Buenos Aires Province), handling **millions of affiliates**.

- Led development of backend services using **Django REST Framework + PostgreSQL**, focused on performance, data integrity and scalability.
- **Migrated the frontend from Django templates to Next.js**, significantly improving maintainability, UX and future scalability.

- Replaced local authentication with **Keycloak**, implementing centralized OAuth2/JWT-based access control.
- Worked with **large PostgreSQL datasets (millions of records)**, optimizing queries and ensuring stable production performance.
- Deployed services using **Docker, GitLab CI/CD, ArgoCD and OKD/OpenShift** in a Kubernetes environment.
- Collaborated with stakeholders using **Figma designs** and Agile workflows.
- Delivered **14 user stories + additional client requirements 100% on time**.
- Worked on a long-lived government platform with high availability requirements and strict data integrity constraints.

Tech stack: Django, Next.js, PostgreSQL, Docker, GitLab CI/CD, Kubernetes, OKD, ArgoCD, Keycloak

---

Backend / Frontend Developer — MecanTronic

Remote · Nov 2024 – Feb 2025

- Delivered **82 tasks** in an Agile environment for the “Plan Mi Casa” platform.
- Implemented frontend features using **React, Redux and Material UI**.
- Contributed to backend services with **FastAPI + MySQL (AWS RDS)**.
- Improved productivity and delivery quality through iterative feedback and better development practices.

Full Stack Developer (Internship) — Thaskify

Remote · Oct 2024 – Nov 2024

- Fixed bugs and implemented new features in a Kanban web application.
- Stack: **React, Node.js, Express, MongoDB**.

Tutor / Supervisor — Argentina Programa (INTI / Unión Informática)

Remote · 2022 – 2023

- Tutor and later Supervisor in Full Stack, Data Analysis and Machine Learning programs.
- Coordinated teams of tutors and instructors in remote learning environments.

PROJECTS

DocSync — HealthTech MVP (Flagship Project)

Ruby on Rails · PostgreSQL · Stripe · OAuth · Docker

- Designed and developed a **production-ready medical appointment management system** from scratch.
- Role-based access (patients, professionals, secretaries, admins).
- Secure authentication with **Devise + Google OAuth**.
- Integrated **Stripe payments**, real-time chat, automated emails, calendar integrations.
- Deployed MVP publicly and validated end-to-end functionality.
- Designed with product mindset, focusing on real users, operational workflows and maintainability.
